Traveling (Domestic and International, Recent Trips: Japan, Utah, Seattle)

Applications Developed

Roommates, Full Stack Web Application - LIVE | GitHub

- A full-stack **CRUD** web application that helps users organize the items in their shared refrigerator while also tracking upcoming expiration dates
- Structured using **React.js** and **Bootstrap** for a dynamic and mobile responsive user interface/experience (**UI/UX**)
- Utilized **Node.js** and **Express** for server-side management and **PostgreSQL** for user data
- Designed using **Figma** for overall application styling and **Meistertask** for task delegation

Dae's Flowers, Full Stack E-Commerce Website- LIVE | GitHub

- A full-stack E-Commerce website that allows users to build customizable bouquets by adding, removing, and purchasing products items in their cart using **Fetch** requests to **PostgreSQL** databases
- Dynamically renders the **DOM** using **React.js** and styles the interface using **Bootstrap**
- Maintained using **GitHub** for version control and management

Recruit and Conquer, Memory Match Game - LIVE | GitHub

- A troll defense matching card game assembled using **HTML5** and styled with **CSS3** with **media queries** for mobile responsive gameplay
- Designed to be responsive using **jQuery** for game statistic updates and continual replay-ability
- Utilized **JavaScript** to change levels in game and provide different **User Interface/User Experience**

Professional Experience

Repligen, Senior Quality Control Lab Technician

09/2017 – 11/2019

- Delegated product testing assignments to a team of 12 lab technicians to ensure deadlines were met
- Monitored and maintained data for product-yield analysis and non-conformance issues
- Organized weekly briefings with the directors of operations and manufacturing to establish projections

Terra Universal, Inc., Purchasing Assistant

06/2017 – 09/2017

- Generated purchase requests/orders for production materials to maintain steady production rates
- Communicated with over 50 vendors to get pricing on materials needed in operations
