Applications Developed

Roommates, *Full Stack Web Application - Live ⧉ / GitHub ⧉*

- A full-stack **CRUD** web application developed to help users organize the groceries in their shared refrigerator
- Frontend structured using **React.js** for a dynamic one-page user interface with **Bootstrap** for mobile-responsiveness
- Implemented **Node.js** and **Express** for server-side management and utilized **PostgreSQL** for user data
- Designed using **Figma** for overall application styling and **Meistertask** for task delegation

Dae's Flowers, *E-Commerce Website- Live ⧉ / GitHub ⧉*

- A full-stack e-commerce **Content Management System** developed to allow users to build customizable bouquets by adding, removing, and purchasing products items in their cart using **Fetch** requests to **PostgreSQL** databases
- Dynamically rendered the **DOM** using the **React.js** framework and styles the interface using **CSS3** with **Bootstrap**
- Maintained using **GitHub** for version control and management

Recruit & Conquer, *Memory Match Game - Live ⧉ / GitHub ⧉*

- A troll defense matching card game assembled using **HTML5** and styled with **CSS3** with **media queries** for mobile responsive gameplay
- Designed to be responsive using **jQuery** for game statistic updates and continual replayability
- Implemented **JavaScript** for memory game logic and for dynamic gameplay

Professional Experience

Doctor Genius, *Production Engineer*
08/2020 – present
